

# Microsoft Certified Systems Engineer

405 Hours / 12 Weeks

## Program Objectives:

This program of study prepares the student to become a Microsoft Certified Systems Engineer (MCSE). The Microsoft Certified Systems Engineer credential is the lead certification for professionals who will analyze the business requirements of a company and design and implement the infrastructure for business solutions based on the Windows® XP, and 2003 platform and Microsoft Server software. Implementation responsibilities include installing, configuring, and troubleshooting network systems.

Upon Completion of this program, participants will be qualified for the following job titles (levels of entry vary depending upon individual experience and background):

Networking Specialist	Computer Engineer
Network Analyst	Manager
Computer Analyst	Project Manager
Database Administrator	Project Leader
Network Administrator	Technical Analyst
Computer Support Specialist	LAN Administrator
